PRECAUTIONS

DANGER

Corrosive to eyes and causes skin burns. May cause allergic skin reaction. May be fatal or cause blindness if swallowed or absorbed through skin.

Do not get in eyes, on skin or on clothing. Wear goggles or face shield, rubber gloves and protective clothing when handling.

Avoid breathing vapour or mist. Do not take internally. Wash thoroughly after handling. This product is toxic to fish and wildlife. Treated effluent should not be discharged where it could drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of waters. Apply this product only as specified on this label.

STORAGE: Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container.

DISPOSAL:

1. Rinse the emptied container thoroughly and add the rinsings to the spray mixture in the tank.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal.
3. Make the empty container unsuitable for further use.
4. Dispose of the container in accordance with provincial requirements.
5. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the Provincial Regulatory Agency or the Manufacturer.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offense under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and, subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

DIRECTIONS FOR USE

GENERAL USE

For the control of slime forming and sulphate reducing bacteria in oil and gas field water systems including enhanced recovery injection fluids, drilling, fracturing and completion fluids, add 50 - 100 ppm of MAGNACIDE 526B depending on the severity of the contamination.

INTERMITTENT OR SLUG METHOD

For treatment of enhanced oil and gas recovery injection fluids, where noticeably fouled, add 75 - 300 ppm of MAGNACIDE 526B. Repeat treatment 1 to 5 times per week or as needed to establish control. Subsequently treat with 25 - 150 ppm of MAGNACIDE 526B. Repeat treatment as needed to maintain control.

#### CONTINUOUS FEED METHOD

For treatment of enhanced oil and gas recovery injection fluids where noticeably fouled, add 75 - 300 ppm of MAGNACIDE 526B continuously until the desired degree of control is established. Subsequently treat with 10 - 35 ppm of MAGNACIDE 526B continuously or as needed to maintain control.

NOTE: Addition of MAGNACIDE 526B should be made at a point in the system where it will be uniformly mixed.

FIRST AID: If swallowed: Do NOT induce vomiting. Drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available drink large quantities of water. Avoid alcohol. Call physician or Poison Control Centre immediately.

IF INHALED: Remove immediately to fresh air. If not breathing, apply artificial respiration. If breathing is difficult, give oxygen. Call physician.

IF ON SKIN: Remove contaminated clothing immediately. Wash skin with large quantities of water. Launder clothing before reuse.

IF IN EYES: Flush with plenty of water for at least 15 minutes. Call a physician.

TOXICOLOGY: CORROSIVE: gastric lavage is contraindicated. Measures against circulatory shock, respiratory depression and convulsions may be needed. Detailed procedures for treatment should be available through Poison Control Centres.
