NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto. The buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

REFER TO MATERIAL SAFETY DATA HANDLING SHEET PRIOR TO USE

DIRECTIONS FOR USE:

Biosperse 230 is a free flowing powder designed to dissolve slowly, providing a continuous source of chlorine for controlling the growth of bacteria and algae in industrial recirculating water cooling towers, air washers and evaporating condensers.

Badly fouled systems should be cleaned prior to initiating treatment. For the initial dosage add 200 to 300 grams of Biosperse 230 per 10 000 litres of water in the system. Repeat this dosage if necessary until the chlorine demand is satisfied and a chlorine residual of 0.5 to 1.0 ppm is established. To maintain a chlorine residual of 0.5 to 1.0 ppm add 25 to 50 grams of Biosperse 230 per 10 000 litres of water daily or as needed as determined by the use of a chlorine test. To prevent contamination and loss of potency the poly drum liner should be re-tied and the lid securely replaced when not in use.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN. May cause eye damage. May cause burns on wet or broken skin. May be fatal or harmful if swallowed. Avoid inhalation of dust and vapours. Keep product dry. Contact with water slowly liberates irritating and hazardous chlorine containing gases. Do not reuse container. This product should be stored in a cool, dry area away from oxidizable materials. Decomposition will occur at temperatures above 220°C.

FIRST AID INSTRUCTIONS:

Wash hands after handling. If in eyes, rinse with cold water and call physician. If in hair or clothing brush off dry powder before washing with cold water -- not hot water.

TOXICOLOGY:

Biosperse 230 will release nitrogen chloride on contact with hot water. Treatment is the same as for chlorine poisoning for dust inhalation.

DISPOSAL:

1. Rinse the emptied container thoroughly and add the rinsings to the spray mixture in the tank.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal or reconditioning.
3. Dispose of the container in accordance with provincial requirements.
4. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the regional office of Environment Canada.
5. For small spills, recover free liquid. Soak up residue with solids absorbent. DO NOT FLUSH INTO SURFACE STREAMS. INFORM ENVIRONMENT CANADA AS IN #4.

Trichloroisocyanuric acid, dry, mixture UN# 2468
