DIRECTIONS FOR USE: FOR DARKLING AND LESSER MEALWORM BEETLE AND HIDE BEETLE CONTROL IN POULTRY HOUSES (Adults and Larvae)

For Poultry houses in which birds are grown on litter: Apply SafeCide BAIT uniformly to floor of poultry house or to old litter with a fertilizer or seed spreader, at the rate of 50 to 100 g per square meter, in bands along feeder lines. Then introduce birds. Reapply after each growout, if needed.

For poultry houses in which birds are grown in cages (layer or high rise 'pit type' houses): Apply SafeCide BAIT uniformly to floor of poultry house with a fertilizer or seed spreader, at the rate of 50 to 100 g per square meter, as needed, to maintain control. If facility is washed down and sanitized using standard cleaning and disinfecting procedures, SafeCide BAIT must be reapplied to continue beetle control.

PRECAUTIONS: Harmful if swallowed. Wash hands thoroughly after handling and before eating, drinking and smoking. May cause eye irritation. Do not contaminate water, food or feed by storage or disposal.

FIRST AID: Immediately contact physician or poison control center if swallowed. If eye contact occurs, flush eyes with plenty of water. Get medical attention if irritation to eyes or skin persists.

STORAGE: Store in a dry place. Do not store where children or animals may gain access.

TREATED LITTER DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

DISPOSAL:

1. Make the empty container unsuitable for further use.
2. Dispose of container in accordance with provincial requirements.
3. For information on the disposal of unused, unwanted product

and the cleanup of spills, contact the regional office of Conservation and Protection, Environment Canada.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offense under the Pest Control Products Act to use a control product under unsafe conditions.
