OSMOSE® FENCE POST MIXTURE® is a black paste, four-in-one very effective wood preservative for the treatment of wood at ground level. Prevents rot at the groundline of posts, poles, and structural wood in contact with ground, or with masonry. Ready to use.

DIRECTIONS FOR USE

Apply with a stiff brush, spatula, or putty knife 10 cm above to 30 cm below ground level. Wood must be debarked prior to application. Waterproof bandage such as a piece of garbage bag or tar paper may be wrapped around the treated area, and nailed or stapled, to prevent the loss of the preservative into the ground. Wrapping is not entirely necessary, if allowed to dry for one week. It may also be applied by spreading the paste preservative on a waterproof bandage, and then wrapped around the area to be treated. Recommended for treatment of fence posts, joints between wood and wood, wood and masonry, such as footings, stringers, sleepers, barn poles etc. Apply 1 litre per 3 to 4 square metres. Also use for remedial treatment of wood already installed. Dig out earth around the post to the required depth, apply preservative in the method described above, then back fill the earth.

PRECAUTIONS

Keep container closed when not in use. **KEEP OUT OF REACH OF CHILDREN AND DOMESTIC ANIMALS.** Keep away from plants, foodstuffs and aquatic animals (fish etc). Harmful or fatal if swallowed. Avoid contact with skin, eyes and clothing. Good ventilation is necessary while treating. Wear synthetic gloves when treating and handling freshly treated wood. For outdoor application only.

FIRST AID

If on skin, wipe off excess. Then wash with rubbing alcohol. Then wash with detergent and water. If irritation occurs, see physician. Take container, label, or product name and Pest Control Product Registration Number with

you when seeking medical attention. If in eyes, flush with water for 15 minutes and call physician. If swallowed, call physician or poison control center immediately. Do not induce vomiting.

TOXICOLOGICAL INFORMATION

Product contains Chrome-Fluor-Borate, Bitumen (Cold Tar) and petroleum distillates.

Treat symptomatically.

NOTICE TO USER

This control product is to be used only in accordance with the directions on this label. It is an offense under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER

Seller's guarantee shall be limited to the terms set out on the label and, subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

DISPOSAL & STORAGE

Do not reuse empty container. Dispose of empty container in household trash. Keep product out of children's and animal reach.
