QUICK KILLING FLEA POWDER

This product containing dichlorophene and carbaryl also helps to stop itching and scratching caused by both insect bites and fungus, often called "summer eczema".

DIRECTIONS: Dust the dog thoroughly starting at the head and

working back, making certain that the fleas powder comes in contact with the skin. Dust dog's living quarters also. Repeat application weekly if necessary.

CAUTION: Do not use on cats or nursing puppies. Keep powder out of dog's eyes. Avoid breathing dust. Wash hands after using. Keep out of the reach of small children.
