PYRA-FOG 100 is a contact insecticide incorporating pyrethrum and a synergist in a highly refined mineral oil base. PYRA-FOG 100 is non toxic to human beings or pets and will not stain when used as directed. PYRA-FOG 100 is formulated to control cockroaches, silverfish, weevils infesting stored food products, bed bugs, flies, and certain other insects in their accessible

stages. PYRA-FOG 100 is relatively safe for use around foodstuffs when used as directed. For best results, PYRA-FOG 100 should be used with electric sprayers, but hand or compressed air sprayers may be used.

#### DIRECTIONS

FOR USE IN FOOD PROCESSING PLANTS: In meat and food processing plants, only apply when plant is not in operation. No exposed food products, ingredients, or packaging materials to be left in the room. Cover food handling equipment. Any treated surfaces that may contact meat food products or other food products should be washed and rinsed thoroughly with potable water after application and before re-use for food processing.

WEEVILS & MOTHS INFESTING STORED FOOD PRODUCTS: Clean areas to be sprayed, especially cracks, crevices and around machinery. Good housekeeping makes for more effective insect control and a definite savings in the amount of CHEMSEARCH PYRA-FOG 100 required. To spray food storage areas, remove food products from shelves and racks. Spray these areas thoroughly with PYRA-FOG 100 and replace food products. For packaged food, spray in such a manner that a light mist will fall upon the packages. For food products in sacks, spray thoroughly between and around the sacks paying particular attention to all cracks, crevices, walls, and any other places that might offer shelter to the weevils. Contact as many weevils as possible. After all the local areas of storage have been sprayed, close all windows and doors.

Thoroughly fog the entire storage areas being extremely careful that all open food products are covered. Do not allow the spray to contact open food products. After 10 to 20 minutes, sweep up and destroy the fallen insects. Repeat spraying at least once a week or when reinfestation becomes evident.

FOR COCKROACHES, SILVERFISH AND CERTAIN OTHER CRAWLING INSECTS: Direct spray in such a manner as to penetrate all cracks, crevices, and other hiding places. Thoroughly fog around shelves, under sinks, refrigeration equipment, dishwashing machines, and bottle washers. Treat all returned bottle cartons and cases. Contact as many insects as possible. For routine control, spray PYRA-FOG 100 at least once a week. For badly infested areas, spray daily. During the summer months, spraying twice a week is advisable.

FOR BED BUGS: Spray mattress, bedstead, corners, etc., wherever

insects might be, as well as the holes or cracks and other hiding places around the bedroom, around baseboards, walls, and floors. Spray should be directed into all cracks and hiding places about the room. Spraying should be repeated at regular intervals or whenever these insects are in evidence.

FOR FLIES AND MOSQUITOES: Close all doors and windows before spraying. Direct spray towards the ceiling and continue spraying with PYRA-FOG 100 until the area is thoroughly fogged. After 10 to 20 minutes, sweep up and destroy all fallen insects. Repeat spraying as often as necessary.

PRECAUTIONS IN USE: Avoid breathing of spray mist and ventilate sprayed areas after application. Avoid contamination of food, utensils and food preparation areas. Combustible mixture. Do not apply near open flame.

FIRST AID: In case of contact with skin, wash thoroughly with soap and water.

TOXICOLOGICAL INFORMATION: This product contains petroleum distillate as a solvent. If ingested, DO NOT induce vomiting.

Should illness occur, get prompt medical attention.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

DISPOSAL:

1. Rinse the emptied container thoroughly and add the rinsings to the spray mixture in the tank.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal.
3. Make the empty container unsuitable for further use.
4. Dispose of the container in accordance with provincial requirements.
5. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the Provincial Regulatory Agency or the Manufacturer.

NOTICE

KEEP FROM FREEZING: If this product is stored in cold or freezing weather it may separate or thicken. This will not harm the performance. Before using, warm to room temperature and stir thoroughly.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto. The buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
