Batch Number: _____

Net Contents: _____ Kg

CBT Biocide C is used to control algae, bacteria and fungi in recirculating commercial and industrial water cooling towers. CBT Biocide C is a broad-spectrum liquid biocide that will not cause foam.

DIRECTION FOR USE

Prior to the use of CBT Biocide C in water cooling towers, systems should be cleaned to remove algae growth, microbiological slime and other deposits. Then make an initial slug addition of 380 - 800 ml of CBT Biocide C per 10,000 litres of water in the system. Repeat initial dosage until control is evident. Make subsequent slug additions of 380 - 800 ml of CBT Biocide C per 10,000 litres of water every 1 to 5 days or as needed. The frequency of addition depends on the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of cooling towers.

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Persons handling the product should wear rubber gloves and goggles and should avoid contact of the product with clothing or skin. After any exposure, wash promptly and thoroughly with an abrasive soap and cool water and finally with glycerine. Keep the container closed when not in use. Do not reuse container and destroy when empty.

FIRST AID

If splashed on eyes or on skin, flush thoroughly with water. If eye irritation persists, seek medical attention. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or, if these are not available, drink large quantities of water. Call a physician immediately.

NOTICE TO USER

This controlled product is to be used only in accordance with the directions on this label. It is an offense under the Pest Control Products Act to use a controlled product under unsafe conditions.

NOTICE TO BUYER

Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
