REGISTRATION NO. 11787 PEST CONTROL PRODUCTS ACT

ICI Chipman
A business of ICI Canada Inc.
Stoney Creek, Ontario
L8G 3Z1

A combination of 2,4-D Amine and Mecoprop (MCP) to kill
Chickweed, Clovers, Black Medic, Creeping Charlie, Knotweed,
Dandelion, Plantain and most other broadleaved weeds. Safe on
all established lawn grasses but not bent grasses.

DIRECTIONS FOR USE

Apply the following rates of Chipman Premium Lawn Weedkiller in
at least 225 L per ha. Apply with an efficient boom sprayer, a
pressure sprayer using the coarse spray, or watering can with a

fine rosette spray. Spray to give thorough coverage of weeds without excessive run-off.

DANDELION, PLANTAIN, CURLED DOCK and HEAL-ALL - 4.5 L per ha (45 mL per 10 L of water per 100 m²).

CHICKWEED, KNOTWEED, CLOVER, BLACK MEDIC, CREEPING CHARLIE and BUTTERCUP - 7 L per ha (70 mL per 10 L of water per 100 m²).

APPLY IN SPRING OR EARLY FALL - REPEAT AS NECESSARY. Avoid spraying during hot, dry spells. Do not spray when rain is forecast. Delay application several days after mowing. After application, do not water for 24 hours and avoid mowing for at least 3 days. Killing action starts within 7 days, but takes more than a month. Best results when weed growth is active and temperatures are above 10°C.

PRECAUTIONS: Keep children and pets away from treated area during application and/or until dry. Harmful if swallowed. Wash hands well after handling. Causes irritation of eyes and skin. Avoid contact with eyes, skin or clothing. Avoid spray drift onto flowers, vegetables, fruits, ornamentals, and other susceptible plants, as the spray may be injurious. Coarse sprays are less likely to drift. Do not use on freshly seeded lawns or bent grass. Watering cans, sprayers, etc. used to apply 2,4-D type weedkillers should not be used for any other purpose. Do not store near feed, fertilizer, seed, pesticides or food. Do not store diluted spray. Keep product in original container during storage. Note - Clippings from a freshly sprayed lawn should not be used as a mulch around roses or other susceptible plants. Do not contaminate food, feed or any body of water.

DISPOSAL: Rinse the emptied container thoroughly and add the rinsings to the spray mixture in the tank. Follow provincial instructions for any required additional cleaning of the container prior to its disposal. Make the empty container unsuitable for further use. Dispose of the container in accordance with provincial requirements. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the regional office of Environmental Protection, Environment Canada. Store above 0°C.

FIRST AID: In case of poisoning, call physician. If on skin, wash thoroughly with soap and water. If in eyes, flush with water for 5-10 minutes and get medical aid. If swallowed, give the patient one to two glasses of water and induce vomiting by

inserting a finger down the throat. Continue with water until vomit is clear. Patient should be lying down with head below level of feet. DO NOT TRY TO CAUSE VOMITING IF THE PATIENT IS UNCONSCIOUS OR IN A CONVULSIVE STATE.

EMERGENCY TELEPHONE NUMBERS: All hours, 1-800-561-3636.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
