McLennan Marketing Corporation  
103-3770 Thurston Street  
Burnaby, B.C.  
V5H 1H7

475 grams 1 Unit

DIRECTIONS:

When using the Pestpurge unit find a suitable location for the unit at least 30 cm above the floor. Plug the power adapter into a 110 volt outlet and then connect the adapter to the unit. At the back of the unit there is a black dial turn this completely to the right and depress the red button. Looking at the front of the unit you will see the red LED flickering. This tell your that the unit is operating. Once a week or more often change this dial at random to the left always depressing the red button. This will reset the circuit to a new pattern preventing the rodents from adapting to it. DO NOT place the unit next to your ear when depressing the red test button. Approximately 4 - 6 weeks after installation you will notice a steady decrease in rodent activity. This will continue as long as you leave the unit plugged in and change sweep rate every week.

NOTE: For use with and in conjunction with normal control practice.

WARNING: Pet mice, rats, gerbils, and monkeys will suffer pain and extreme stress when subjected to the sonic waves as generated by the PESTPURGE unit. To avoid causing these animals pain, simply place them in a room farthest away from the unit and closed the door. This will provide your pets with a nice quiet environment to live in. This unit will not Bother DOGS, CATS, or BIRDS.
