Guelph, Ontario N1H 6J2

Siphotrol Forte II kills adult and pre-adult dog and cat fleas. It contains a unique combination of ingredients, permethrin and Precor. The permethrin kills adult fleas, brown dog and American dog ticks, cockroaches, silverfish, earwigs and ants. Precor, an insect growth regulator, kills the pre-adult fleas present in the house for up to 210 days. It controls fleas hidden in carpets, rugs, drapes, upholstery and pet bedding. Siphotrol Forte II leaves no bad smell, no sticky mess and will not stain

furnishings. Because of the long term flea control provided by Siphotrol Forte II, regular use of this product will reduce the need for topical treatment of pets for ectoparasites.

DIRECTION FOR USE:

SHAKE WELL BEFORE USING.

For effective flea control, adjust the spray nozzle to create a fine mist and apply uniformly without wetting furniture and carpeting. This product is designed for use on all fabrics and carpeting, however, some natural fibres (such as wool) and synthetics may be adversely affected by any liquid product - always test a hidden area prior to use. One 1.9 L bottle will treat approximately 75 square metres (800 ft.²). Do not use as a space spray. Care should be used when treating wood surfaces, as water spotting may occur. DO NOT TREAT PETS WITH THIS PRODUCT. For effective flea and tick control, pets should be treated with a registered flea and tick control product designed for use on pets, and treatment of the pet should be combined with the sanitation of any area used by the pet. Vacuum floors, carpets, and furniture (discard vacuum bag after use) and wash the pet's bedding, living quarters, and surrounding areas prior to treatment with this product. Be sure to treat pet bedding and other resting places, as these are primary hiding places for fleas and ticks. No need to remove pet bedding after treatment. If pest problems persist, a second application 2-3 weeks after the initial treatment may be necessary. To kill cockroaches, ticks, silverfish, earwigs and ants, apply directly to pests.

PRECAUTIONARY STATEMENTS:

KEEP OUT OF REACH OF CHILDREN. May be harmful if swallowed or absorbed through the skin. Avoid breathing spray. Avoid contact with skin, eyes or clothing. Wash thoroughly after handling. Do not allow children or pets to walk on treated surface until completely dry. Do not spray on animals, humans, plants, foodstuffs, food utensils, fish bowls or animal feed areas. Do not contaminate foodstuffs. Do not use in food serving areas while food is exposed. Thoroughly wash all surfaces that might be in contact with food before re-use.

FIRST AID:

If on skin: Remove contaminated clothing and wash affected areas with soap and water. If in eyes: Flush eyes with plenty of water. Call a physician if irritation persists. If swallowed: Drink 1 or 2 glasses of water and induce vomiting by touching finger to back of throat. Never give anything by mouth to an unconscious or convulsing person. Seek medical attention or call

a poison control centre immediately.

STORAGE: Store in original container, away from children.
Protect from freezing or high temperatures.

DISPOSAL: Do not re-use empty container. Make the empty container unsuitable for further use. Dispose of the container in accordance with provincial requirements. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the provincial regulatory agency or the manufacturer.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and, subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on the condition.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offense under the Pest Control Products Act to use a control product under unsafe conditions.

Vet-Kem, Siphotrol and Precor are registered trademarks of Wellmark International.
