DIRECTIONS FOR USE:

To be used only in the manufacture of an insecticide which is registered under the PEST CONTROL PRODUCTS ACT or for a Fertilizer/Insecticide product which is registered under the FERTILIZERS ACT Read Technical Bulletin for formulation details.

PRECAUTIONS:

May be fatal if swallowed.

Excessive absorption through
skin may be fatal.

Warning - Eye irritant

May cause skin irritation

KEEP OUT OF REACH OF CHILDREN

Do not get in eyes, on skin, or clothing. Avoid breathing vapours. Handle concentrate in a ventilated area. When handling concentrate, wear protective clothing such as long-sleeved shirt, long-legged pants, hat, gloves and boots resistant to aromatic solvent, i.e. neoprene or nitrile butadiene rubber. The use of a respirator approved by CSA for filtering spray mists or organic vapours is recommended when handling the concentrate in a confined area. Wash thoroughly with soap and water after handling and before eating, drinking or smoking. Remove contaminated clothing and wash before reuse. Discard contaminated leather articles including shoes. This product is a (mild) skin sensitizer. Repeated exposure may cause allergic reaction in sensitive individuals. If this should happen, discontinue use and consult a physician. Keep away from food, foodstuffs and water supplies.

PHYSICAL OR CHEMICAL HAZARDS

COMBUSTIBLE. Do not use or store near heat or open flame. Do not cut or weld container.

FIRST AID

If swallowed: Call a physician or poison control centre immediately. Do not induce vomiting. Contains an aromatic petroleum solvent. Do not give anything by mouth to an unconscious person.

If on skin: immediately wash with plenty of soap and water. Get medical attention.

If in eyes: Flush with plenty of water for at least 15 minutes. Get medical attention if irritation persists.

If Inhaled: Remove to fresh air if symptoms of cholinesterase inhibition appear and get medical attention immediately.

TOXICOLOGICAL INFORMATION

Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. If exposed, plasma and red blood cholinesterase tests may indicate degree of exposure (baseline data are useful). Atropine, only by injection, is the preferable antidote. Oximes, such as Pralidoxime Chloride, may be therapeutic if used early; however, use only in conjunction with atropine. Supportive care. Treatment based on judgement of the physician in response to reactions of the patient.

STORAGE

1. Do not store near food, feed, seed, fertilizers or other pesticides.
2. Keep in original container during storage.
3. Store in a cool, dry, well-ventilated place. Keep away from moisture and temperature above 50°C.

DISPOSAL

Canadian formulators of this manufacturing concentrate should dispose of unwanted product and containers in accordance with municipal or provincial regulations. For additional details and clean up of spills, contact the provincial regulatory agency or the manufacturer.

NOTICE TO USER: This control product is to be used only in accordance with the directions on the label. It is an offence under the PEST CONTROL PRODUCTS ACT to use a control product under unsafe conditions.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
