KEEP IN A DRY PLACE
FOR USE INDOORS OR OUTDOORS

NOX-ALL PRODUCTS LTD.
1820 WEST 3RD AVENUE
VANCOUVER, B.C.
V6J 1K8

DIRECTIONS FOR USE: Place one-quarter to one-half teaspoon at 2-3 m intervals of contents of this package in locations frequented by mice, or where mice have been known to feed. Bait must be protected from children, dogs, cats, poultry, livestock, etc. by bait boxes, cages or other suitable means. An uninterrupted supply of bait should be maintained for at least 10-15 days. Baits should be examined regularly and replenished before completely eaten. If bait moulds, decomposes or becomes sour it should be replaced. Where a continuous source of infestation prevails from nearby dumps or fields, permanent bait stations should be used and bait replenished as needed. Baiting should continue until complete lack of feeding is noted.

PRECAUTION: This product contains as its active ingredient an anticoagulant chemical which if taken accidentally by humans, domestic animals or pets, may reduce the clotting ability of the blood and serious hemorrhage may result. Keep out of reach of

children and domestic animals. Wash hands after using. Do not contaminate feed or foodstuffs.

FIRST AID: In case product is accidentally eaten, give a tablespoon of salt in a glass of warm water and repeat until vomit fluid is clear. Call a Physician immediately.

TOXICOLOGY: When a human has been known to have accidentally ingested Noxall Moucide containing diphacinone, blood transfusions combined with intravenous injections and oral doses of Vitamin K are indicated, as in the case of hemorrhage caused by overdoses of Dicumarol R.
