NON-SELECTIVE HERBICIDE

NON-VOLATILE AND NON-FLAMMABLE

DIRECTIONS FOR USE:

Turn adjustable nozzle in direction of arrow. Squeeze trigger to operate. Adjust nozzle to provide desired spray pattern. Thoroughly wet stems and leaves of weeds. Soil in cracks of patio

may be treated for residual control of seedling weeds. Type of vegetation, new growth, rainfall, etc. will determine frequency of application. Repeat as needed.

What to look for: Twisted growth of vegetation should appear within a week after treatment. Vegetation should then discolour and die. Mature grass and hard-to-kill vegetation may take up to 4 weeks to die.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN: Avoid contact with skin or eyes. Avoid breathing spray mist. Do not use or rinse sprayer on or near lawns, crops and shrubs or where their roots may extend. Do not use where it may move into contact with roots of desirable vegetation (eg. on sloped areas). Do not apply within 30 cm of lawn grasses. Do not use on soil required for planting within 2 years. Avoid spray drift into garden plants.

Protective Clothing:

- Wear long-sleeved shirt, long pants, socks and shoes.

Operator Use Precautions:

- Wash hands before eating, drinking, using tobacco or using the toilet.
- After treating, wash thoroughly.
- If pesticide penetrates clothing, remove immediately; then wash contaminated skin thoroughly and shower. Launder contaminated clothing separately before reuse.

Re-entry Interval:

- Do not allow people (other than the applicator) or pets on the treatment area during application. Do not enter treated areas until spray has thoroughly dried.

DISPOSAL:

Do not reuse empty container. Dispose of empty container in household garbage.

FIRST AID:

If on skin, wash thoroughly. If in eyes, flush with plenty of water and get medical attention. If ingested, induce vomiting. Consult a physician or contact a Poison Control Centre.
