VET-KEM SIPHOTROL HOUSEHOLD FLEA SPRAY kills pre-adult fleas. Prevents pre-adult fleas from hatching into adult biting fleas for 210 days.

VET-KEM SIPHOTROL HOUSEHOLD FLEA SPRAY contains a unique ingredient that kills pre-adult fleas. It reaches fleas hidden in carpets, rugs, upholstery and pet-bedding. Protects your home from reinfestation and flea buildup, your pets and family from bites.

If a large number of adult fleas (the biting stage) are present, a flea killer such as VET-KEM's PREMISE SPRAY which is effective against adult fleas should be used. VET-KEM SIPHOTROL HOUSEHOLD FLEA SPRAY contains a unique ingredient that kills only pre-adult fleas.

DIRECTIONS: Hold 60-90 cm from surfaces to be treated. Be sure to apply uniformly using a sweeping motion to carpets, rugs, drapes and all surfaces of upholstered furniture. Be sure to treat pet bedding as this is a primary hiding place for fleas. No need to remove pet bedding after treatment. DO NOT TREAT PETS.

One can of VET-KEM SIPHOTROL HOUSEHOLD FLEA SPRAY will treat a surface area equivalent to approximately three 3m x 3.5m rooms. Avoid wetting furniture and carpeting. Do not use as a space spray. Apply spray directly to the treatment site.
