KEEP FROM FREEZING

DESCRIPTION: Bolt Liquid Residual is a highly effective residual liquid formulation which provides rapid knockdown and kill of crawling insects, including those resistant to certain chlorinated hydrocarbon and phosphate insecticides. Kills cockroaches, crickets, earwigs, silverfish, saw-toothed grain beetles, millipedes, scorpions, sowbugs, spiders. In addition to rapid kill, the residue on treated surfaces continues to kill insects for weeks after the residue has dried.

USE DIRECTIONS: Non-Food Areas, such as garbage rooms, lavatories, floor drains, vestibules, entries, offices, locker

rooms, machine rooms, boiler rooms, garages, mop closets and finished goods storage areas. Not for use on plants. Spray only on surfaces. Do not use as a space spray. Apply as a wet (coarse) spray to infested surfaces until wet. Apply with either power-operated or hand sprayer. Avoid excessive wetting of asphalt tile, rubber and plastic materials.

CAUTION: COMBUSTIBLE MIXTURE

Do not use or store near heat or open flame. Do not smoke while spraying.

Roaches. Spray into cracks, crevices, around baseboards, and other places where these insects hide. Spray until wet. Apply behind and beneath cabinets, refrigerators, sinks, stoves, and in and around waste containers. When insects are driven out, spray directly. Repeat as required.

Ants. Apply to ant trails, also around door and window frames where ants may enter. Repeat as required. Silverfish, Crickets, Earwigs, Millipedes, Scorpions, Sowbugs, Spiders, Saw-Toothed Grain Beetles. Spray localized areas infested by these insects. Repeat as required.

Flies and Mosquitoes. For use outdoors only: As an aid in reducing annoyance from these insects, spray outside surface of screens, doors, window frames or wherever these insects may enter. Also treat other places where these insects may alight or congregate. For pest control in food handling areas of meat packing and food processing plants where exposed food is held, processed or served, use as "crack and crevice" treatment only. Apply in small amounts in a pin-thin stream directly into cracks and crevices between different elements of construction, between equipment and floors, openings leading to voids and hollow spaces in walls, equipment legs and bases where insects hide. Do not use this product in conduits, motor housings or electrical switch boxes. Controls cockroaches, crickets, earwigs, silverfish, millipedes, sowbugs, spiders. Aids in the control of saw-toothed grain beetles.

APPLICATIONS OF THIS PRODUCT IN AREAS WHERE FOOD IS HELD, PROCESSED OR SERVED, OTHER THAN AS A CRACK AND CREVICE TREATMENT, IS NOT PERMITTED.

NOTE: Treat food processing plants early in the season before canning or other processing begins. Repeat applications if necessary when this plant is not in operation. Remove or cover any exposed food products, equipment or packaging materials before spraying. Rinse all equipment with water before resuming

operation.

In Inedible Products Areas. Apply as a residual spray to walls, ceilings, and other infested areas. Any exposed food products, equipment or packaging materials must be removed or covered before spraying. Rinse all equipment with water before resuming operations. Repeat applications as necessary. Spraying unloading docks and outside areas where insects congregate will aid in preventing re-infestations. Good sanitation and proper disposal of wastes is essential in any effective insect control program.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. May be harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing of spray mist and provide adequate ventilation of area being treated. Contact with skin, eyes, or clothing should be avoided. Wash thoroughly after use. Do not contaminate food, utensils, dishes, drinking water, or food preparation areas. At no time should food contact treated areas. Remove pets and cover fish bowls before spraying.

Do not allow children in treated areas until surfaces are dry.

TOXICOLOGICAL INFORMATION:

To Physician: Atropine sulfate is antidotal.

DISPOSAL:

1. Rinse the emptied container thoroughly and add the rinsings to the spray mixture in the tank.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal.
3. Make the empty container unsuitable for further use.
4. Dispose of the container in accordance with provincial requirements.
5. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the Provincial Regulatory Agency or the Manufacturer.
