DIRECTIONS FOR USE:

Read entire directions thoroughly before use. Mix **1 PART FLY KILL CONCENTRATE TO 4 PARTS WATER**. Make just enough finished product to treat the horse. The dilution should not be saved and used again. This product has been specially developed for use on horses. When used as directed, it provides a protective hair coating against biting and

nuisance flies. This product may also be used as a spray in barns for quick knock-down and kill of flies and mosquitoes.

HORSES: To Wipe On: Brush horse's hair before application to remove excess dirt and dust. Moisten a soft cloth with the diluted Fly Kill product and briskly run cloth over the hair. It is best to apply by rubbing against the hair growth. Give special attention to the legs, flanks, shoulders, neck and area around the face where flies generally are seen. Once applied, do not wet skin. Apply 30-60 mL diluted solution on mature horses and 15-30 mL diluted solution on ponies. Repeat daily or as required. Do not allow solution to contact animal's eyes, mouth or any wounds.

Use As A Spray: The diluted Fly Kill product may be applied directly to the horse as a fine mist spray. Spray horses once daily applying just enough spray to wet the hair ends. Apply 30-60 mL diluted solution on horses and 15-30 mL diluted solution on ponies. Do not spray on face of animal (wipe on face).

BARN OR STABLE: Remove all animals before spraying. Close doors and windows. Spray with a hand sprayer onto areas where mosquitoes and other flies congregate. For space spray, direct spray upwards and away from applicator to fill room. Wear mask or respirator and protective clothing when applying spray mist. Keep barn or stable area closed for 10-20 minutes after spraying. Ventilate well before humans or animals re-enter. Do not contaminate feed or water troughs. Do not spray over milk or milking equipment.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN.

Avoid breathing spray mist. Harmful if swallowed, inhaled or absorbed through skin. Wash thoroughly with soap and water after handling. Do not contaminate feed, water or food stuffs. Do not cover horses immediately after treatment.

FIRST AID:

If swallowed, **DO NOT** induce vomiting. Obtain medical attention immediately. If vomiting occurs spontaneously, keep victim's head below hips to prevent the breathing of vomitus into the lungs. If in eyes, flush with plenty of water and obtain medical attention. If on skin, wash with soap and water. If irritation persists, obtain medical attention.

DISPOSAL:

Do not reuse container. Follow provincial instructions for any required cleaning of the container prior to its disposal. Make the empty container unsuitable for further use. Dispose of the container in accordance with provincial requirements. For information on the disposal of unused, unwanted product and the cleanup of spills, contact

the regional office of Environmental Protection, Environment Canada.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offense under the Pest Control Products Act to use a control product under unsafe conditions.
