TotalEx GRASS & WEED KILLER SUPER CONCENTRATE

In case of medical emergency, call toll free day or night 1-800-228-5635, x 153

GENERAL PRODUCT INFORMATION:

TotalEx* Grass & Weed Killer is non-selective herbicide. It controls most annual and perennial grasses, including lawn grasses, broadleaf weeds and brush (i.e. virtually anything that is green and growing). It is absorbed by the leaves and moves throughout stem and roots to control the entire plant. Mature perennial weeds should be treated after seed heads, flowers or fruit appear. All plants are most easily controlled in the young, actively growing, seedling stage.

TotalEx* Grass & Weed Killer wilts and browns plants within 48 hours. Plants usually dry up within 7 days. There is no soil activity and will not run off to affect nearby vegetation. To ensure that TotalEx Grass and Weed Killer gets down to the roots, avoid tillage or disturbing the treated area for 7-10 days after treatment or as directed below. Make sure to contact only those plants that you want to kill. TotalEx Grass and Weed Killer will damage or kill any desirable plants it contacts. Use a repeat application on any seedlings that re-grow from seeds.

DIRECTIONS: Mix 40 mL of TotalEx Grass and Weed Killer in 2 L of water. Apply the 2L of the spray solution to 40 m² (2 paces by 20 paces or 4 paces by 10 paces) of area to wet the leaves and stems but not to the point of runoff.

Patios, driveways, around trees and fence posts, along fence lines and edges of lawns:

edging and patio weed control: Apply to young vegetation if possible. When spraying around trees take care not to contact leaves, or young green bark.

Lawn/Garden Renovation: To kill grasses such as quackgrass and other undesirable species in lawns and ornamental and vegetable gardens, apply at rate described above. In lawns, apply only to the area where control is desired. Drift or application to desirable plants or grasses around the target area will be killed. Allow 3 days before disturbing the soil or replanting. This will ensure time for the product to penetrate and kill the roots. This container will treat up to 500 m² (500 mL), 1000 m² (1 L).

Brush control: Apply at rate described above. Wet leaves, but do not apply to run off. Apply when leaves are fully expanded. Cut back growth to 1.5 m before treatment. Contact all leaves and green bark.

CAUTION: Avoid spray contact on desirable plants as any plant contacted may be killed. Do not spray in windy conditions. Do not spray to the point of run-off. Heavy rainfall immediately after application may wash the chemical off the foliage and repeat treatment may be required. Do not apply if rainfall is forecast for the time of application.

PRECAUTIONS: Avoid contact with eyes or prolonged contact with skin. KEEP OUT OF REACH OF CHILDREN AND PETS. CAUSES EYE IRRITATION, HARMFUL IF SWALLOWED. KEEP CHILDREN AND PETS OFF TREATED AREAS FOR 24 HOURS OR UNTIL DRY. Wash immediately after using this product. Do not contaminate water, foodstuffs, seed or feed by storage or disposal. Do not reuse container.

Spray solutions of this product should be mixed, stored and applied only in stainless steel, aluminium, fibreglass, plastic and plastic-lined steel containers. Do not mix, store or apply this product or spray solutions of this product in galvanized steel or unlined steel (except stainless steel) containers or spray tanks. This product or spray solutions of this product react with such containers and tanks to produce hydrogen gas which may form a highly combustible gas mixture. This gas mixture could flash or explode, causing serious personal injury, if ignited by open flame, spark, welder's torch, lighted cigarette or other ignition source.

FIRST AID: If on skin, immediately flush with plenty of water. Remove contaminated clothing. Wash clothing before reuse. **If ingested**, immediately dilute by swallowing water or milk. Contact a physician or poison control centre. **If in eyes**, immediately flush with plenty of water for at least 15 minutes. Contact a physician or Poison Control Centre. Take container, label or product name and Pest Control Product Registration Number with you, when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically

DISPOSAL: Rinse container and empty rinsings into sprayer. Do not re-use container. Wrap and dispose of empty container with household garbage.
