BioGuard MSA Algicide is effective in controlling algae in swimming pools. It is especially recommended for green, blue-green and mustard coloured algae growths.

DIRECTIONS FOR USE: Vacuum leaves and any other foreign debris from pool. Brush visible algae from the surface with surface compatible brush. Adjust pool water pH to 7.4-7.6 range. Add BioGuard Burn Out, as per label directions, to oxidize water soluble organic wastes. Allow to circulate for 1 hour. Now apply 65 mls of MSA Algicide per 10,000 litres of water. Dilute the concentrate into 5 or more litres of water and apply in areas of greatest circulation. In extreme cases if algae persists, repeat MSA application after 2-4 days. Use BioGuard Pool Magnet and Kwik-Clear to remove residual copper and dead algae after successful treatment. For recurring algae problems, use MSA

Algicide with a maintenance dosage of 15 mls. per 10,000 litres weekly.

PRECAUTIONS: Keep out of reach of children. Corrosive. Causes severe eye and skin damage. Harmful if swallowed. Do not mix with any other chemicals. Avoid contact with skin and eyes. Rinse container thoroughly before discarding. Do not reuse. This product is toxic to fish. Do not discharge effluent into lakes, rivers, ponds or public waters.

DISPOSAL: For information on the disposal of unused, unwanted product and the cleanup of spills, contact your municipality, your provincial Ministry of Environment or the regional office of Environment Canada.

FIRST AID: If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. For eye contact, get medical attention. If swallowed, drink promptly a large quantity of egg whites or gelatin solution. If those are not available, a large quantity of water. Call a physician immediately.
