

Section 12 Notice **Additional Information Required to Fulfill the Terms and Conditions for Conditional Registration**

Product Name: RANMAN 400SC AGRICULTURAL FUNGICIDE

Registration Number: 27984

Application Number: 2006-6803

PMRA #: 1429958

During the conditional registration period which has been granted to December 31, 2008, the following information is to be generated and must be provided to the Pest Management Regulatory Agency by **July 1, 2008**, and must indicate the DACO numbers specified. A partial response to the outlined Terms and Conditions will not be accepted.

PART 8 ENVIRONMENTAL CHEMISTRY AND FATE

DACO: **8.3.2.1**
Title: **Terrestrial Field Dissipation Study - Canada**

Required DATA: **The applicant is required to submit a new terrestrial field dissipation study, to be conducted in P.E.I. As the disappearance of the parent compound is well documented, the new study should be conducted with a single application of Ranman 400SC Agricultural Fungicide at a high enough rate to adequately track the formation and dissipation of the major transformation products. Application should occur during the expected application window for potatoes and still allow for sufficient sampling periods to adequately characterize the initial fate and persistence of the major transformation products prior to ground freeze-up. The applicant is directed to the PMRA's newly proposed guidelines for conducting a terrestrial field dissipation study, where it is recommended that the LOQ should be 1-2 orders of magnitude less than the EEC, and that 15 soil samples should be obtained per replicate plot.**
