

## Evaluation Report for Category B, Subcategory B.3.13 Application

**Application Number:** 2012-5635  
**Application:** Changes to product label precautions  
**Product:** Evercide Wasp & Hornet Killer 20861  
**Registration Number:** 30745  
**Active ingredients (a.i.):** Tetramethrin  
D-Phenothrin  
**PMRA Document Number:** 2360050

### Purpose of Application

The purpose of this application was to amend the label of Evercide Wasp & Hornet Killer 20861 (Registration Number 30745) by removing label restrictions from the primary panel and to remove text from the Directions for Use and Precautions Sections.

### Chemistry, Value and Environmental Assessments

Chemistry, value and environmental assessments were not required for this application.

### Health Assessments

New data indicate that Evercide Wasp & Hornet Killer 20861 is of low acute toxicity to rats via the inhalation route of exposure. The remaining acute toxicity profile remains the same. Evercide Wasp & Hornet Killer 20861 is of low acute toxicity via the oral and dermal routes of exposure, is not irritating to the eyes and mildly irritating to the skin of rabbits, and is not a dermal sensitizer in guinea pigs.

Based on the revised acute inhalation hazard statements, the currently present exposure statements, “Use only in well ventilated areas” and “Ensure bystanders are not present during application” on the registered label for Evercide Wasp and Hornet Killer 20861 were removed, as requested by the registrant.

### Conclusion

Following review of the application the PMRA has approved the label amendments for Evercide Wasp & Hornet Killer 20861
