

Evaluation Report for Category C, Subcategory 3.11 Application

Application No.: 2006-4733
Category: C.3.11 application (New or changes to product labels -New Pests)
Product: Folicur 432 F Fungicide
Registration No.: 25940
Actives (a.i.): Tebuconazole (TEU) guarantee of 432 g/L
PMRA Document Number: 1401450

Background

Folicur 432 F Fungicide was first registered June 15, 1999. It is registered to control several diseases on spring and winter wheat. For specific details of uses, diseases controlled, application rates and methods, precautions, restrictions, and personal protective equipment requirements, refer to the product label.

Purpose of Application

This application is to amend the registration of Folicur 432 F Fungicide to add the disease claim for Septoria glume blotch caused by *Stagonospora nodorum* on wheat.

Chemistry, Health and Environmental Assessments

A chemistry assessment was not required since there was no change to product chemistry. Health and environmental assessments were not required since the use pattern, including host crops, application rates and timings, of the component products remained unchanged.

Value Assessment

Two trials conducted in 2003 and 2005 in Ontario and Manitoba were reviewed. Results of these trials supported the claim for control of glume blotch on wheat at the proposed rate and use directions of one application of 292 g Folicur 432F between 75% heading and 50% flowering. No phytotoxicity was reported in any of the trials.

Conclusions

The PMRA has completed an evaluation of the subject application and has found the information sufficient to amend the registration of Folicur 432F Fungicide to add the disease claim for Septoria glume blotch caused by *Stagonospora nodorum* on wheat.
