

Evaluation Report for Category B, Subcategory B.3.10 Application (New or Changes to Product Label – Tank Mixes)

Application Number: 2024-3366
Application: Category B.3.10 (New or Changes to the Product Label – Tank Mixes)
Product: FBN Bromoxynil 240 EC
Registration Number: 35241
Active ingredient (a.i.): 240 g/L bromoxynil (present as octanoate ester)
PMRA Document Number: 3648863

Purpose of Application

The purpose of this application is to amend the registration of FBN Bromoxynil 240 EC to add the general tank mix statement as per the published PMRA Guidance Document – Tank Mix Labelling.

Other minor label amendments were also proposed.

Chemistry, Health and Environmental Assessment

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

Value Assessment

A thorough review of the label determined that the addition of the general tank mixing statement is acceptable as it is consistent with the requirements in the PMRA Guidance Document – Tank Mix Labelling.

The inclusion of the general tank mixing statement on the label allows growers greater flexibility to select tank mixtures to control pests in labelled crops. Flexibility in the selection of tank mix partners may contribute to resistance management practices, integrated pest management programs or the control of a broader range of pests, with an associated cost- and time-savings by the user.

Other minor label amendments are also supported.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the subject application and has found the requested amendments to the FBN Bromoxynil 240 EC label are acceptable.
