

Evaluation Report for Category B, Subcategory B.3.10 Application (New or Changes to Product Label – Tank Mixes)

Application Number: 2025-0030
Application: Category B.3.10 (New or changes to product label – Tank mixes)
Applicant: NuFarm Agriculture Inc..
Product: Enforcer M Herbicide
Registration Number: 30691
Active Ingredients (a.i.): 80 g a.e./L fluyoxypyr (present as 1-methylheptyl ester), 200 g/L bromoxynil (present as octanoate ester) and 200 g a.e./L MCPA (present as 2-ethylhexyl ester)
PMRA Document Number: 3716061

Purpose of Application

The purpose of this application is to amend the registration of Enforcer M Herbicide to include the amendments that are below:

1. Add the general tank mix statement as per the published PMRA Guidance Document – Tank Mix Labelling.
2. Remove historic tank mix partner products.

Other minor label amendments were also requested.

Chemistry, Health, and Environmental Assessments

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

Value Assessment

A thorough review of the label determined that the addition of the general tank mix statement is acceptable as it is consistent with the requirements in the PMRA Guidance Document – Tank Mix Labelling.

The inclusion of the general tank mixing statement on the label allows growers greater flexibility to select tank mixtures to control pests in labelled crops. Flexibility in the selection of tank mix partners may contribute to resistance management practices, integrated weed management programs or the control of a broader range of pests, with an associated cost- and time-savings by the user.

Other label amendments, including the removal of historical products as tank

mix options from the label is also supported.

Conclusion

The PMRA has completed an assessment of the subject application and has found the information sufficient to support all the requested label amendments to the Enforcer M Herbicide label.
