

Evaluation Report for Category B, Subcategory 4.3 Application

Application Number: 2007-5723
Application: Amendment
Product: Blight Ban C9-1
Registration Number: 28392
Active ingredients (a.i.): *Pantoea agglomerans* strain C9-1
PMRA Document Number: 1664893

Background

The end-use product Blight Ban C9-1 is currently conditionally registered in Canada. The toxicological database is complete. The outstanding data requirements for the end-use product pertain to confirmatory human pathogen screening data.

Purpose of Application

The purpose of this application is to convert the registration of Blight Ban C9-1 from conditional to full. Additionally, storage stability data was submitted to extend the duration of storage from 5.5 months at -20°C to 15 months at -20°C.

Chemistry Assessment

The confirmatory quality assurance (QA) data provided adequately satisfies the requirement for representative QA data.

Results from storage stability testing from three bags of Blight Ban C9-1 at -20°C showed that the end-use product is stable for a period of up to 15 months under these conditions.

Health Assessments

A health assessment was not required since there was no change to the formulation.

Environmental Assessment

An environmental assessment was not required since there was no change to the formulation.
