

Evaluation Report for Category B, Subcategory 4.6 Application

Application Number: 2015-4295
Application: Conversion – submission to fulfill requirements of registration on a product with full registration
Product: ECOFOG-170 DPA
Registration Number: 31377
Active ingredients (a.i.): Diphenylamine (DPA)
PMRA Document Number : 2586088

Purpose of Application

The purpose of this application was to address the requirements of full registration for ECOFOG-170 DPA. In the original value assessment, additional information was requested to support the value of recommendations for 1) a low rate of 20ml/1000kg and 2) a second application at 50% of the first application rate.

Chemistry, Health and Environmental Assessments

Chemistry, health and environmental assessments were not required for this application.

Value Assessment

Additional information had been required to support the value of the label recommendations for 1) a low rate of 20ml/1000kg and 2) a second application at a rate of 50% that of the first application. In light of these recommendations having been subsequently removed from the ECOFOG-170 DPA label by the applicant, the requirements of registration resulting from the initial value assessment of the product are deemed to have been fully addressed.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the information provided in support of the product, ECOFOG-170 DP, and has found the information sufficient to satisfy the requirements of full registration.
